Be smart, be green

HOW TO BE A WORLDLINER WITH A SUSTAINABLE LIFESTYLE?

On the occasion of the European Sustainable Development Week 2019, Worldline has established this general guide gathering different recommendations from reliable sources to help you make more conscious and sustainable choices in your lifestyle. Discover the different actions to reduce your environmental footprint at every step of your life!

EUROPEAN SUSTAINABLE DEVELOPMENT WEEK
30 MAY – 5 JUNE

Worldline

CSR by Worldline

Step 1: Measure your ecological footprint

Don't forget your digital footprint: The virtual world has its real environmental impacts! Test the impact of your web browsing through a website Eco-score (in French): ecoindex.fr

Step 2: Be aware of our Global Sustainable Challenges

In 2015, the United Nations launched the 17 Sustainable Development Goals, a universal, global and inclusive action plan and roadmap that address economic, environmental and social challenges while embarking all stakeholders, from government to the private sector, from NGOs to citizens.

Step 3: Consume Less, Save More, Live Better

The different sustainable actions YOU CAN TAKE TO MAKE A DIFFERENCE

People

The environment and Human Rights = same fight for a more sustainable and fairer society

PAGE 4

Climate change

Choose ecological means of transport: walking, cycling, carpooling, train, bus, etc.

PAGE 5

Energy consumption

Save energy : control and rationalize your electricity consumption

PAGE 7

Resources waste

The best waste is the one that does not exist: avoid, reuse and recycle

PAGE 8

Biodiversity

Choose your diet wisely to protect biodiversity

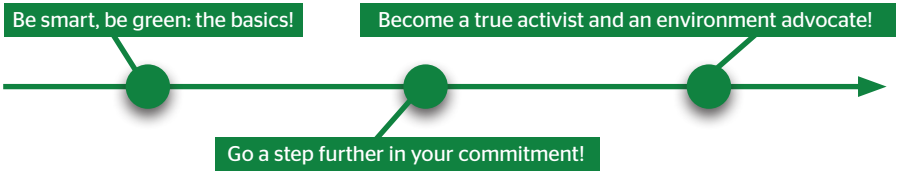

PAGE 9

Water

Make a responsible use of water: avoid waste and pollution

PAGE 10

You don't have to do it all at once! Begin with the basics and strengthen your environmental commitment step by step

SAME FIGHT FOR THE ENVIRONMENT AND HUMAN RIGHTS

All over the world, people experience the negative effects of climate change and environmental degradation, including water shortage, fisheries depletion, natural disasters due to deforestation (drought, flood) and unsafe management and disposal of toxic and dangerous wastes and products. Indigenous peoples suffer directly from the degradation of the ecosystems that they rely upon for their livelihoods. According to the International Labor Organization, more than 1 human out of 200 is a slave in the world today (~40 M), of which 71% are women and girls, and 25% are children, mainly in Southeast Asia and Africa. If forced labor is heavily rooted in the rise of armed conflicts, it is aggravated by climate change effects and responds to economic profitability objectives in sectors such as clothes, food, minerals in our smartphones. That's why changing our consumption habits impacts both the environment and humanity as a whole.

FIGHT CLIMATE CHANGE, LOWER CO2 EMISSIONS

Fact to keep in mind: If the Internet were a country, it would be the 6th largest producer of greenhouse gases emission in the world (source: Ademe).

Be smart, be green: the basics!

- ☐ Avoid unnecessary trips, use videoconferencing and telework twice a week
- ☐ Choose ecological means of transport (walking, cycling, carpooling, train, bus, etc.)
- ☐ Benefit from financial support to change your car for a model with a lower environmental footprint
- ☐ Prefer seasonal foods and food that is grown locally, favor short circuits
- ☐ Reduce your meat consumption (from 90kg/year on average to 25kg) and favor white over red meat
- ☐ Reduce consumption of animal based products (meat, fish, dairies, etc.)

Go a step further in your commitment!

- ☐ Reduce the number of hours you fly each year / Only take the plane in case of absolute necessity
- ☐ Reduce the number of km you travel by car / motorcycle and apply Ecodriving whenever safe and possible
- ☐ Eat a vegetarian meal at least once a week
- ☐ Walk 10,000 steps daily
- ☐ Reduce your fossil fuels consumption by investing in solar boilers and heatpumps

Become a true activist and an environment advocate!

- ☐ For people who live in the city: sell your car and rent a car when needed
- ☐ Focus on less remote holiday destinations
- ☐ Foster cohabitation
- ☐ Offset your carbon footprint, for instance by planting or buying trees (see EcoTree in France)
- ☐ Relay the message around you and invite your entourage to proceed to eco-movements
- ☐ Invest in eco-responsible funds
- ☐ Measure your monthly consumption of electricity, fuel and gas, and set yourself reduction targets

Climate change is intrinsically linked to energy consumption (see following page), as today's world globally still relies mainly on fossil energies (or energies producing toxic waste like nuclear) for mobility, food, heating, IT services, etc.

WATCH OUT YOUR DIGITAL FOOTPRINT: VIRTUAL WORLD HAS A TRUE IMPACT

- ☐ Rationalize your use of emails, limit reply to all and the sending of attachments in emails
- ☐ Use collaborative tools such as Sharepoint / Lync / Circuit rather than emails
- ☐ Chose a low definition image in your email signature, a text format rather than HTML
- ☐ For quick research, prefer a tablet rather than a computer to consume less energy
- ☐ Favor eco-friendly search engines like Ecosia, (or Lilo in France)
- ☐ Save frequently viewed sites as "favorites" in your internet browser to avoid using search engines
- ☐ Regularly uninstall softwares and apps you don't use anymore, clean your mailbox
- ☐ Unsubscribe from newsletters, limit notifications, close tabs
- ☐ Reduce the time you spend watching videos on Netflix, Youtube, Twitch etc., avoid using 4G
- ☐ Turn off wifi, bluetooth and GPS on your phone when not needed and clean your cloud
- ☐ When buying an IT equipment look for the following labels : EPEAT GOLD / TCO / Der Blaue Engel
- ☐ Avoid connected gadgets

SAVE ENERGY: SOBER IS THE NEW COOL

Fact to keep in mind: Up to 13% of the global electricity will be consumed by the IT sector by 2030 whereas the world will face a 50% increase in demand for energy (source: United Nations).

Be smart, be green: the basics!

- ☐ Turn off the light when leaving a room last
- ☐ Shut down your computer, screen, TV or any device not in use (you can put a timer on your internet box), plug out chargers when not in use, and don't leave appliances on standby!
- ☐ Use low energy light bulbs, get rid of halogen lamps and adapt the power of lighting to each use
- ☐ Regularly clean light bulbs and dust of the radiators
- ☐ Insulate your home and windows (with thermal glass foil, or double glazing for instance), check every year that windows and external doors do not allow drafts and install thick curtains / shutters at all windows
- ☐ Turn off heating, air conditioning, and the water heater when leaving for more than 4 days
- ☐ Regularly check the temperature of the fridge / freezer, clean and defrost cold appliances at least once every 3 months (or buy equipment that does it automatically), and descale your machine
- ☐ Place cold appliances away from heat sources (oven, stove, window ...)
- ☐ Control your electricity consumption and use power strips to disconnect devices

Go a step further in your commitment!

- ☐ Reduce the heating of your accommodation in winter by 2°C (ideally 19°C or less during the day / 18°C at night) and the air conditioning in summer, and use a room thermostat
- ☐ At work, reduce heating and air conditioning at night and on weekends, according to local instructions
- ☐ Make sure your accommodation is not too big and close the doors of the less heated rooms
- ☐ Equip hydraulic radiators with thermostatic valves and regularly disassemble the heating circuit
- ☐ Avoid oil-based heating and the use of an open chimney for heating
- ☐ Avoid operating multiple refrigerators, TV and adapt the volume of your fridge to your needs
- ☐ Whenever possible: do not use tumble dryers
- ☐ Put a lid on the pan while cooking
- ☐ Set your computer on eco-mode

Become a true activist and an environment advocate!

- ☐ Choose an electricity supplier that provides renewable energy (like Enercoop in France and Cociter in Belgium)
- ☐ Choose heating and electronic equipment that are energy efficient and consume less water
- ☐ Do not buy TV larger than 40"
- ☐ Limit the use of the cloud to the strict minimum (stop watching TV via the internet, etc.)

AVOID, REUSE AND RECYCLE TO REDUCE WASTE

Fact to keep in mind: 6.5 to 8 million tons of plastic waste are dumped into the oceans each year and this figure is expected to double by 2050 (source: PlasticsEurope).

Be smart, be green: the basics!

- ☐ Repair and upgrade before buying
- ☐ Reuse before recycle or give away
- ☐ Maintain your devices (like computer) so they don't break down
- ☐ Don't just throw your waste everywhere, look for a bin instead
- ☐ Sort all your recyclable waste at home and at work, according to local instructions
- ☐ Learn about the sorting instructions to be more efficient
- ☐ Avoid food waste, cook your leftovers and take inventory of cupboards and fridge before going shopping (Be aware, 1 beef steak wasted equals to 4.89km car drive (Ademe))
- ☐ Avoid printing and prefer two-sided B&W, two pages per sheet when appropriate
- ☐ Reuse disposable cup or bring your mug to work, according to local instructions
- ☐ Use reusable bags and refuse plastic bags
- ☐ Give away your old clothes, textiles or functional electronical equipment
- ☐ When possible, prefer the durable alternative to a disposable product

Go a step further in your commitment!

- ☐ Choose to buy products in bulk to avoid packaging waste
- ☐ Prefer unprocessed, unpackaged food (stop junk food!)
- ☐ Use a stainless steel bottle to avoid using plastic bottles
- ☐ Rent rather than buy your equipment when possible
- ☐ Borrow books or CDs from the library or internet networks instead of buying them
- ☐ Reduce the number of apparel you buy each year (max 1kg/person/year)
- ☐ Put your printer in automatic eco-mode, use refillable ink cartridges and toners and use thin printing fonts (e,g, : Century gothic)
- ☐ Don't over-equip yourself with IT gadgets
- ☐ Bring back your expired drugs to your local pharmacy and your old glasses to the optician
- ☐ Bring back your old batteries to the store

Become a true activist and an environment advocate!

- ☐ Say no to advertising that arrives in your letter box,
- ☐ Refuse cash receipts and refuse flyers and free newspapers on the street or on public transit
- ☐ Support the circular economy and fight cultural obsolescence
- ☐ Give a second life to your cell phone (association Pour la vie in France)
- ☐ Try solid cosmetics with less packaging and use washable cottons
- ☐ Buy ugly fruits to support the fight against food waste
- ☐ Reuse organic waste thanks to a compost (for garden) or a Vermicomposter (for flat)
- ☐ Have less than 10 single-use items in your trash
- ☐ Buy recycled paper, certified : Blue Angle or FSC (preferably not PEFC)

PROTECT BIODIVERSITY THROUGH A SUSTAINABLE CONSUMPTION

Fact to keep in mind: 75% of the terrestrial environment and 40% of the marine environment show "significant signs of degradation" (source: IPBES, Iddri).

According to global experts, our food is the first cause of loss of biodiversity in the world. Because of the genetic selection of a few species, the use of chemical products with an intensive crop model, the over-consumption and food waste, the mismanagement of resources and the reduction of natural areas and forest for agriculture, we notably face declining soil fertility, increased pollution and marine environment degradation, fish scarcity and massive species extinction.

Be smart, be green: the basics!

- ☐ Avoid plastic waste and ban disposable tableware for your picnics and parties
- ☐ Diversify your diet with forgotten and local vegetables to promote local biodiversity
- ☐ Reduce your meat consumption (from 90kg/year on average to 25kg) and favor white over red meat
- ☐ Reduce consumption of animal based products (meat, fish, dairies, etc.)

Go a step further in your commitment!

- ☐ Favor organic products (look for your local country regulated Eco- and Organic-labels, and rely on international certifications like the European Ecolabel, FSC, MSC)
- ☐ Give priority to food products labeled MSC (sustainable fishing), ASC (sustainable fish breeding), Red Label
- ☐ Choose eco-friendly products that are not harmful to the environment, look for label: Eco cert, European Ecolabel, NF environment
- ☐ Avoid products with palm oil that is responsible for deforestation
- ☐ Avoid products containing endocrine disruptors that pollute the rivers and lower the fertility of the species
- ☐ Use a mobile app to help you have a more sustainable consumption through more informed choices: seafoodwatch.org, mylabel.io, buyornot.org, etiquettable.eco2initiativ.com, yuka.io

Become a true activist and an environment advocate!

- ☐ When on vacation, opt for ecotourism
- ☐ Opt for wood products or furniture with the ecolabel FSC
- ☐ Opt for eco-friendly clothes (organic cotton, linen or recycle fabric)
- ☐ Support local farmers that respect the environment (AMAP in France)
- ☐ Learn more about agroecology and permaculture

"Nature provides a free lunch but only if we control our appetites"

William Ruckelshaus

MAKE A RESPONSIBLE USE OF WATER

Fact to keep in mind: 1 billion people still do not have access to fresh water (source: United Nations) and oceans feed 50% of the world's population while providing more than 50% of the oxygen we breathe.

Be smart, be green: the basics!

- ☐ Avoid running tap water and use the low-flush toilet
- ☐ Spot water leaks
- ☐ Shower rather than take a bath
- ☐ Reduce your shower time to 5min
- ☐ Don't wash by hand and use the dishwasher instead
- ☐ Only switch on the dishwasher when it's full
- ☐ Water your garden only in the morning or in the evening
- ☐ Avoid plastic waste on the beach
- ☐ Wash as normal but rinse with cold water

Go a step further in your commitment!

- ☐ Use a glass when brushing your teeth
- ☐ Use a tray to wash dishes
- ☐ Install and use the dual flush system in toilets
- ☐ Drink the tap water and invest in a jug filter to purify water from the tap
- ☐ Check your sunscreen products (ewg.org/sunscreen) to avoid any chemical substances that could cause damage to you and to the oceans
- ☐ Give priority to food products labeled MSC (sustainable fishing), ASC (sustainable fish breeding)

Become a true activist and an environment advocate!

- ☐ Equip kitchen and shower with thermostatic faucet
- ☐ Install a water saver on the shower pommel
- ☐ Collect rainwater to water the plants and wash your car

WHAT DO WE DO FOR SUSTAINABILITY @ WORLDLINE?

- Have a look at our CSR commitments and actions in our Integrated Report
- Sign Worldline's environmental charter to contribute to our environmental actions
- Learn more about the environmental impact of the digital world
- Choose sustainable eating habits in the canteens

(Find the charter dedicated to your site/country in our Share-point space)

CHANGING YOUR CONSUMPTION HABITS IS EASY!
