INTEGRATING CSR AT THE CORE OF WORLDLINE'S BUSINESS AND PROCESSES THROUGH OUR MATERIALITY MATRIX

Worldline's CSR approach is based on a materiality analysis that has enabled the Company to prioritize its CSR actions around the most critical topics for its business activities while taking into account its stakeholders' expectations. The analysis, conducted in 2014 and updated in 2018, has identified four main challenges. Worldline evaluated the interest and coverage level and the financial impacts (over the next five years) according to the stakeholders for each identified issue within the different challenges. The results of the 2018 analysis were formalized in the following Worldline Materiality Matrix, which was validated by senior management. The 2018 update highlighted the Data privacy and Energy transition topics.

Based on its materiality analysis, Worldline has prioritized its CSR actions around 4 main challenges:

BUSINESS BUILDING CUSTOMER TRUST WITH RELIABLE, SECURED, INNOVATIVE AND SUSTAINABLE SOLUTIONS

In the rapidly evolving environment of the payment and digital service industry, Worldline needs to adapt and continue to ensure a high quality and secure level of service and to design inspired, innovative and sustainablesolutions in order to create value for its customers.

PEOPLE BEING A RESPONSIBLE EMPLOYER BY FULFILLING OUR EMPLOYEES' POTENTIAL

In Worldline's industry, having a qualified workforce combined with integrating cultural diversity, is a key driver for the Company's success. Worldline must attract, recruit, develop and retain employees who can provide the expertise necessary to meet its customers' needs.

ETHICS A VALUE CHAIN ENSURING BUSINESS ETHICS WITHIN OUR VALUE CHAIN

To maintain its credibility and the confidence of its customers while processing finances and sensitive data, Worldline integrates business ethics as an absolute requirement and has zero tolerance for unethical behavior, be it within its organization or in its supply chain.

ENVIRONMENT LEVERAGING THE ECO-EFFICIENCY OF OUR DATA CENTRES AND OFFICES

Because its business involves data processing, which consumes large amounts of energy, Worldline strives to develop eco-efficient solutions to reduce its energy consumption - especially carbonized energy - thus contributing to the fight against climate change as well as proposing sustainable solutions to customers.
